

Technical description

Coffee machines with hand-lever activation.

- 3-litres tank with stainless steel lid
- thermosifonic brewing group with manual operation
- vibration pump with self priming valve and thermal protection
- automatic boiler fill device
- tank water sensor with buzzer
- boiler pressure gauge
- pressurestat with solid state relay
- 1,3 litres boiler with 1.450W heating element (V230) or 1.200W (V115)
- anti vacuum valve and safety valve with direct drain
- anti-scorch hot water and steam wands with Teflon insert
- cup warming tray
- frame and body in polished stainless steel
- LED indicators
- lever switch
- Design and components in compliance with CE and UL regulations

Optional accessories:

- PID version with display for boiler temperature setting and display and pump pressure gauge
- manual milk frother (replacing the regular steam wand)
- available in plumbed-in version (max 2,5 bar)

Model	STELLA PROFESSIONAL
Version	1 GROUP
Dimensions mm.	280x475x360h
Boiler capacity	1.3 lt.
Power	1550 watt
Voltage	220/240V single phase, 110V single phase (1.400W)
Weight	20 kg
